Our slogan

**Harmony between the work of nature and the work of
man**

Harmony between tradition and future

Our ambition

Perpetuate these harmonies

Our four strong quality points

- **Hard climate, robustness of the seedlings.**
- **A company of medium size which keep the « small-scale production style », very important for our productions.**
- **We guarantee fresh seedling, delivered in a delay from 24 to 48 hours.**
- **A devoted team**

LOCATION

**Located at Rivière-les-Fosses, in the South of Haute-Marne
(Champagne-Ardenne region)**

**On the Langres' shelf, close to the Burgundy and the Franche-
Comté regions, not far from the Vosges, Meurthe & Moselle,
Meuse, Marne, Aube,...**

**The proximity of the motorway with the Til Châtel or The
« Perrogney Langres Sud » tolls make the acces to our
manufacture easy.**

BACKGROUND OF THE FOREST NURSERY

- **The family company Pépinières Moissenot founded in 1870 at Rivières-Fosses, has been standing for three generations. The nursery forestry gradually grows from 4,25 ha in 1960 to 42,5 ha nowadays.**
- **At the end of August 1996, Mr and Mrs Moissenot decided to be retired. Mr Hubert Goës took the nursery forestry and the company over September 1996, founded the EARL Pepinières Forestières Moissenot. At present, the Pépinières holds the 15th position in France.**
- **For the forest, centuries-old heritage, the Pépinières Forestières Moissenot have been participating since 1870 to the regeneration of your plantings and the afforestation of free spaces.**

THE CLIMATE

- **Oceanic climate with appreciable continental influences, especially in winter.**
- **Long and cold winters and warm and stormy summers.**
- **Precipitations quite abundant (between 810 and 1070 mm per year), are regularly spread over all year long. However, they are more important from November to March and in May. We count from 150 to 180 days of precipitations including from 20 to 30 days of snow.**

THE CLIMATE

- The yearly average temperature is fresh, from 9° to 11° Celsius, with 70 to 80 days of frost.
- The duration of the yearly total exposure is approximately 1750 hours, but never goes up to an average of 170 hours from Novembre to January.
- The moderate winds dominate regions from South to West and also from North to East in winter.

OUR ACTIVITIES

- **Since 1870, our nursery forestry specialized in « forest plant » has covered some 74 acres in cultures.**
- **An average of 2.5 millions of plants each year to our customers.**
- **Robust plants cultivated on the Langres' shelf with an average altitude up to 400m.**
- **The organic improvements are our sole connections to guarantee a fresh growth as well as a perfect growing.**

OUR PRODUCTION

The bareroot forest hardwoods

Species	Size (cm)	Available quantity	Species	Size (cm)	Available quantity
<i>Robinia pseudoacacia</i>	30/60	100.000	<i>Carpinus betulus</i>	25/40	50.000
	60/90	100.000		40/60	50.000
	90/120	30.000		60/90	10.000
<i>Sorbus torminalis</i>	15/30	1.000		90/120	10.000
	30/50	2.000	<i>Quercus robur</i>	20/30	100.000
